KEY HIGHLIGHTS: Performance update after a challenging 3Q17

Mail

- 9M17 addressed mail volumes decline of 6.1%, given a negative evolution in 2Q17 (-7.6%) and 3Q17 (-7.2%), put a strong pressure on Mail EBITDA, due to a high level of fixed costs. Two quarters of above normal declines in mail volumes indicate a trend of acceleration
- Revenues from Retail & Distribution Networks utilisation by the growth businesses (Banco CTT and Express & Parcels, respectively) partially offset the impact of mail volumes decline on revenues, but with incremental costs

Express & Parcels

- Growth in parcels volumes in Portugal, offset by a decline in the E&P banking network business, pressure on the distribution costs of the Mail network (due to networks integration)
- Spain performance continues to improve towards breakeven before the end of the year

Banco CTT & Financial Services

- Growth in the customer base of Banco CTT was achieved with the need of temporary staff
 hires and additional costs at the CTT Retail Network
- In Financial Services, public debt stock fees received in 3Q16 resulted in a tough comparison in the quarter, however, savings & insurance revenues are still above the level of last year

KEY HIGHLIGHTS: Stabilisation of revenues as a result the development of the growth levers, which, in turn, put pressure on the recurring operating costs, and the Transporta acquisition

¹ Excluding €7.5m Altice revenues in 9M16 and €5.7m Transporta revenues and €6.4m Transporta recurring operating costs in 9M17.

² Amount of savings & insurance placements (€3.2bn) and redemptions (€1.4bn).

KEY HIGHLIGHTS: Strong growth from the Express & Parcels, banking businesses and the Transporta acquisition supported the increase in revenues

- Mail revenues decline was higher than expected, given the impact of the 6.1% mail volumes decline, just a part of which was offset by the 1.7% average price increase in the period and by the mix effect (3.7% registered mail revenues growth). The impact of a temporary suspension of lottery sales in the Retail Network was 2.1m
- Express & Parcels was the main driver of growth, resulting from a strong parcels evolution in Portugal, and especially in Spain, and the Transporta acquisition (+€5.7m impact since May-17)
- Financial Services revenues declined mainly due to volumes / revenues declines in the payments business. Growth initiatives for this business line are under deployment
- Banco CTT with revenues below target but fully compensated by lower costs. Mortgage loans starting to contribute

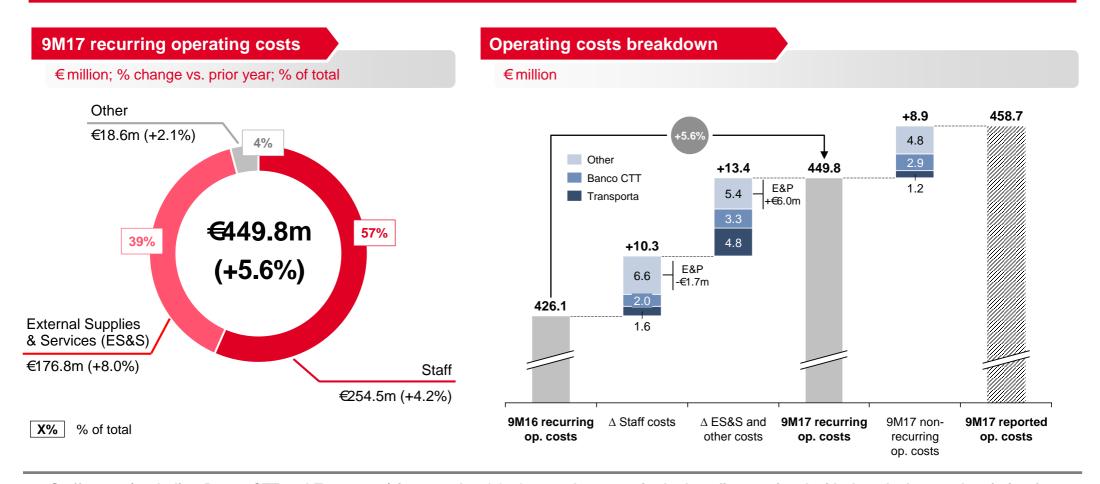

¹ Including income related to CTT Central Structure and Intragroup Eliminations amounting to -€26.6m in 9M16 and -€25.2m in 9M17.

² Excluding Altice 9M16 revenues.

KEY HIGHLIGHTS: The larger part of the recurring costs increase resulted from the

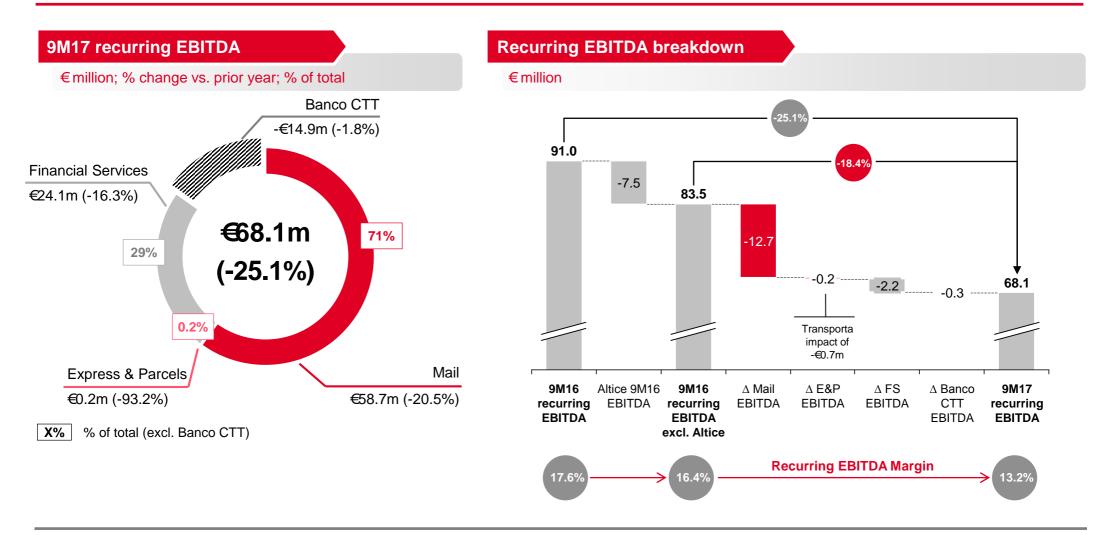

Transporta acquisition and the growth in Banco CTT and Express & Parcels business units

- Staff costs (excluding Banco CTT and Transporta) increased mainly due to a lower cut in the benefit associated with the telephone subscription fee vs 9M16 (+€1.4m impact), an update in salaries (+€1.7m), and an increase in temporary staff (+€2.0m), given the need to support the growth initiatives at the Distribution (E&P) and the Retail (Banco CTT) Networks
- ES&S and other costs (excluding Banco CTT and Transporta) increased mainly as a result of an increase in energy and fuel costs in Portugal (+€1.6m), an increase in distribution and transport costs at Tourline resulting from volumes growth and increase in delivery routes (+€3.5m) and an increase related to temporary work and travel expenses at Tourline (+€1.0m)
- Non-recurring costs of €3.9m include primarily costs related to staff contract terminations (€2.4m, of which €1.2m in Transporta), Banco CTT (€2.9m) and consulting projects (€1.9m), related to the transformation programme

KEY HIGHLIGHTS: The 9M17 recurring EBITDA performance was below expectations, driven by mail volumes decline worse than forecast and the incremental costs of the networks

The Mail business unit was mainly responsible for the decline in the recurring EBITDA. This was due, on the one hand, to mail volumes decline worse than expected (c.€m impact) and, on the other, to the fact that it owns the main operating assets of CTT (Retail & Distribution Networks) used in the development of the growth levers and hence incurring the largest part of the operating costs increase

KEY HIGHLIGHTS: The adjusted operating free cash flow reflects the continued positive cash flow generation of Banco CTT (capture of deposits)

GUIDANCE UPDATE: Given the 9M17 performance, CTT revises its guidance for FY17

- Worse than expected addressed mail volumes decline will impact negatively FY17 recurring EBITDA. After 2Q17 and 3Q17 volumes declines above 7%, an acceleration trend is perceived which will have a material impact in FY17
- Strong growth in Express & Parcels and Banco CTT customer base puts temporary pressure on the overall CTT cost base, which is not yet being fully absorbed by the installed capacity in the Distribution and Retail Networks, respectively
- Spain performance continues to improve towards breakeven before the end of the year
- Sizable cost restructuring, adjusting the scale of operations to the current needs, is being prepared to be presented before the end of the year

GUIDANCE UPDATE

- The company now expects to achieve recurring EBITDA around 20% below the initial FY17 guidance
- Given this EBITDA evolution, the Board of Directors intends to propose a FY17 dividend of c.€0.38 per share, payable in 2018
